Fire Risk Assessment HSF 91

This Fire Risk Assessment was undertaken in order to comply with the Regulatory Reform (Fire Safety) Order 2005 (the "Fire Safety Order").

The purpose of the report is to provide an assessment of the risk to life from fire, and where appropriate, to make recommendations to ensure compliance with fire safety legislation. The report does not necessarily address the risk to property or business continuity from fire. The survey was conducted as a "non-invasive" survey and only those areas of the building structure that were readily accessible were inspected.

The survey did not access inaccessible areas such as ducts, or all basements, lofts or ceiling voids.

| 26.2 | Are systems in place for reporting and managing safety measures that have fallen below standard or are faulty? e.g. a fault log | Yes | No | | | | | |
| 26.3 | Are records kept for all the fire checks and tests identified above? | <mark>Yes</mark> | No | | | | | |
| 26.4 | Is a system in place for people to report concerns with fire safety or fire safety system problems? | Yes | No | | | | | |
| 26.5 | If you have answered "No," to the above please provide further detail of the action required to resolve the issue and add this to the action plan | | | | | | | |

Fire risk assessment – Risk Rating

A fire risk assessment considers the **likelihood** of fire in a premise (with fire prevention measures currently in place) in conjunction with the **potential consequences** in the event of a fire (death being the most extreme).

| | | | Potential severity of harm | | | | | | |
|--------------|------|--|----------------------------|----------------|-----------|------------------|--------------|-------|--|
| | | | Slight 1 | t Harm | Mo 2 | derate Harm | Extreme 3 | Harm | |
| | Hi | ghly unlikely | Trivia | 1 | Low | 1 | Medium | | |
| | 1 | | 1 | | 2 | | 3 | | |
| Likelihood | Uı | nlikely | Low | | Med | dium | High | | |
| of fire | 2 | | 2 | | 4 | | 6 | | |
| occurring | Lil | kely | Medi | um | High | ı | High | | |
| | 3 | • | 3 | | 6 | | 9 | | |
| | | | | | | | | | |
| Risk Rating | | Action Priori | tv | | | | | | |
| | | Immediate action required. Considerable resources might have to be allocated to reduce the risk. If the premises are unoccupied, it should not be | | | | | | | |
| High (6-9) | | occupied until the risk has been reduced. If the premises are occupied, urgent action should be taken. | | | | | | | |
| Medium (3-4) | | Actions to control the risk must now be considered and steps to manage the risk until control measures can be provided must implemented. It is essential that efforts are made to reduce the risk. Risk reduction measures, which should take cost into account, should be implemented within a defined time period. Where moderate risk is associated with consequences that constitute extreme harm, further assessment might be required to establish more precisely the likelihood of harm as a basis for determining the priority for improved control measures | | | | | | | |
| Low (2) | | Implement reasonable control measures and monitor. No major additional fire precautions required. However, there might be a need for reasonably practicable improvements that involve minor or limited cost | | | | | | | |
| Trivial (1) | | No action re | quired u | nless level of | f harm o | or likelihood ch | nanges. | | |
